ENVIRONMENTAL NOTICE

Health and plumbing codes prohibit the use of any gas and oil interceptor for the disposal of volatile wastes into city sewers or private septic systems. Triple Garage Basins are designed to handle incidental wastes from washing vehicles or floors.

Gas and oil in the effluent from the interceptor or triple garage set basin shall not exceed the levels specified by the sewage treatment authority having jurisdiction, as promulgated by local ordinances and regulations.

Structural Foam Triple Garage Set

24" X 36"
OR
30" X 36"

Basins can be nested for ease of shipping.
